Projects

Blood Bank Management (Javascript)

A web-based platform designed to streamline blood donation, inventory management, and hospital requests. It enables donor registration, real-time stock tracking, and emergency blood requests, ensuring efficient and timely distribution. Key features include donor and inventory management, automated notifications, and a secure database for data privacy.

Search Engine Optimization (SEO)

Implemented on-page and off-page SEO strategies to improve website visibility and ranking. Optimized content, metadata, and site structure for better search performance. Utilized keyword research, backlink building, and analytics to enhance organic traffic and user engagement.
